

# Berkshire Mountain Distillers Cask-Finished Bourbon Whiskey Series Release

Berkshire Mountain Distillers (BMD) is doing a special collaboration with 10 influential craft brewers across the country. Inspired by his love of craft beer and his passion to create new, unique spirits, Distiller and Owner Chris Weld is finishing his award-winning Berkshire Bourbon in recently emptied beer barrels. The name of the brewery and beer will be indicated on each bottle and be released only in the region from which it hails.

## Released November 2013:

**Brewer:** Tröeg's Brewing Company, Hershey, PA;  
[www.troegs.com](http://www.troegs.com)

**Beer:** Beer-barrel aged Tröegenator double bock. A strong dark ale with a warming, rich chewy body. Vanilla, oak, toasted coconut and a subtle spiciness round out this beer nicely; 8.2% ABV.

**Process:** For our Tröegenator cask finished bourbon, we put our fully aged Berkshire Bourbon in Tröegenator barrels for a six month cask finishing process. During this time the bourbon takes on certain nuances of the Tröegenator. The end product is an incredible amalgamation of two unique and wonderful beverages that both came about due to a love of the craft, determination and a desire to produce something different. The resultant beer is complex and spirited.

**Tasting Notes:** This bourbon brings together two very different worlds. The nose is pleasantly confusing, a beautiful partnership between whiskey and beer, a sharp demarcation—wonderfully synergistic—exists here in this spirit that will please lovers of both whiskey and beer alike. Notes of sweet mocha, vanilla and spicy rye that are heavily overlaid by floral hoppy notes. There is a bittersweet quality to this bourbon that is just wonderful!

**Product Availability:** Approximately 1,500 bottles (250 cases) will be available in Pennsylvania and New Jersey. 43% ABV.
